## PROFESSIONAL SUMMARY

---

I am a hardworking and motivated Software Engineer who has acquired extensive knowledge in the field through the study of Computer Science at degree level and work experience in tech firms. I have strengthened my skills in frontend web development with experience involving projects. Moreover, I have contributed immensely to improve my skills on a daily basis resulting to increased performance and productivity.

---

## WORK HISTORY

---

**Junior Software Developer** | December 2022 – Date

**TM30 Global Limited** – Onikan, Lagos

- Modified existing UI functionalities within the company's codebase
- Actively collaborated with team members to architect and develop client applications. This involved working closely with designers to implement responsive and visually appealing user interfaces.
- Worked closely with backend developers to understand API specifications, implemented robust solutions for data communication and conducted thorough testing to guarantee the reliability and efficiency of the integrated API.

**Internship** | September, 2022 – November, 2022

**New Horizon** – Lagos, Festac

- Worked with senior colleagues in integrating API
- Built responsive and user-friendly interfaces with html, css and tailwind

---
